Take Joke by the Hand and Lead it
About Until Thoroughly Acquainted
with the Assumptions of the
Dentist and Spring it.

Ever since John Able Abel for calling
himself a "dentist" the world has been
taking lessons in the art of being
foolish. The world has been taking
lessons in the art of being foolish. The
world has been taking lessons in the
art of being foolish. The world has
been taking lessons in the art of
being foolish. The world has been
taking lessons in the art of being
foolish. The world has been taking
lessons in the art of being foolish.

The Morning Telegraph has called
upon the "dentist" the great ex-
pert and scientist, who is said to
have been the first man who ever
made a denture. He was said to
have kept his secret well and was
made famous. Prof. Smith said:

"Denture is anything that is funny.
It is in everything and in everybody.
Extracted humor is followed by laugh
for, it is by striking the responsive
humor chord in the human breast
that we get our true effects."

"Therefore, no matter how great
the joke, unless it is told in a manner
to strike that cord, it falls of its own
dead weight and furnishes us with one
of the saddest sights in life."

"Select from any well known joke
book a story. It should not be too
new, as it is likely not to go so well
as an old reliable joke that has been
told over several centuries. Then cut
from it all unnecessary adjectives, de-
scriptions and epithets."

"Never apologize for a joke."
"Take your joke by the hand, and
after having led it about until you
know all of its family history, assume
the air of a funeral director telling
the relatives from whose side of the
casket they are to give the late in-
terment, and then give utterance to
your joke."

"The best way to let the point of
the story fall in mind and then put it
away entirely until you need it. Noth-
ing so interfering with the success of
a joke as to have the point hanging
in the air before the story is
well started."

"Remember above all things that the
face should be as solemn as the voice
low and well modulated, with just a
suggestion of sadness in it."

"Learn to pause at the right place,
and if you are in doubt at all, the best
place to pause is just before you start."
This has been known to save a
man many friends that he otherwise
might have lost.—New York Morning
Telegraph.

The Grand Jury adjourned
Wednesday after remaining in
session longer than has been
known here for a long time if at
all. They were kept pretty busy
during their term and judging
from the number of indictments
they were given they have very little
to escape their notice. There were
sixty indictments returned and
a some of these more than one
was indicted.

MANSLAUGHTER
The Verdict In The Case of
Commonwealth vs
Wm. Moore.

The jury in the case of com-
monwealth vs Wm. L. Moore re-
turned a verdict finding the de-
fendant guilty of manslaughter
on last Thursday night at 9
o'clock. The case had been in
progress since Monday and was
hard fought on both sides, go-
ing to the jury at 3:30 o'clock
Thursday. Great interest was
manifested in the trial through-
out, the Court house at all times
being crowded to its utmost ca-
pacity. Shortly after eight
o'clock the jury sent down a
question in writing, asking what
they desired a verdict of voluntary
manslaughter. Prior to this
nothing had been known as to
the feeling of the jury and there
was much speculation on the
part of the crowd as to what
the verdict would be, but after this
all realized what was coming and
the defendant was completely
prepared for the verdict which
followed. Shortly after nine
o'clock the jury filed into the
Court House and announced that
they had reached a verdict. Dur-
ing this time there was the in-
crease of a crowd which was
completely packed in an announce-
ment, during which the foreman
in a low tone of voice read the
verdict. The defendant who had
borne up remarkably well under
the severe strain of the four
previous days broke down and
wept.

On last Monday the Court pro-
nounced sentence on the prisoner
and he was taken to Frankfort
yesterday morning by Sheriff
Sam Anderson.

A Royal Slave
Persons who enjoy a top

Saturday night when the Royal
Slave will be presented at the
Opera House. We recall that
the play was produced here a
few years and we feel sure in
saying that those who attend
the then will be glad to do so
again. The principal character
Aquila an Indian of noble char-
acter. The play abounds in
such noble sentiment as "You
may tear the flesh from my bones
but a secret from an Indians
heart never."

Debutante Ride Over.
London—Lady Moore Brown, the
young debutante whose engagement
to Mr. Allan W. Campbell, an officer
in the Coldstream Guards, has just
been announced. It is reported that
the event took place last season at
Amphill House, Bedfordshire, the
seat of Mr. Anthony Woodhouse, who
was a remarkable private "box" sec-
ure and only in London that was
assailed by the Duke of Bedford.
It is said that the Duke and even cas-
ualties take part in the farm work.

ODD WEATHER DEVICES
NATURE FURNISHES MANY SIM-
PLE BUT INTERESTING ONES.

Swiss Weather-Woman, a Common Toy,
Quite Trustworthy—Chameleon
Barometer a Curiosity—Simple
Test for Humidity.

One of the oldest and simplest
ways of telling whether the air is dry
or moist is to suspend a piece of
seaweed out of doors, or even in an
apartment where the air is moist.
The weed is crisp and dry at the
approach of fine weather, while
it is flabby and moist when rain is
likely.

A common toy, the Swiss weather-
woman, is really quite trustworthy in
its forecasts, says the Times. The
woman, of course, emerges from the
little house in fine weather, while the
man comes out when wet conditions
are to be expected.

It is a curious state of the at-
mosphere both figures stand just inside
the house. The movements are due
to the twisting of a cord of caout-
chouc, which is highly sensitive
to changes in the humidity of the air.

Two very singular weather de-
vices are those in which a frog and a
leech are employed. In the former case
a glass jar is filled to about two-
thirds of its capacity with water. A
little wooden ladder is constructed,
and this is placed inside the jar.

A frog will live quite happily in
a position for a few weeks, and it
will be found that in fine weather
the creature will climb out up to the
edge of the jar. In stormy weather,
however, the frog prefers to remain
under the water.

Even more reliable as weather
prophets are leeches. A single leech
is placed in a broad glass bottle with
a piece of fine muslin stretched over
it or over the mouth. On the approach
of fine or frosty weather the leech
always swims out of the bottle and
climbs up to the top of the muslin.

When rain or wind is
coming the creature rises to the sur-
face. While a contrary wind is blowing
it will cause it to be much agitated; at times
the leech will even leave the water
altogether, so sensitive is the animal
to an electrical disturbance.

The chameleon barometer is a curi-
osity which has passed from the
realm of blighting-paper which has
been introduced by the late Admiral
Pittroy. This is formed of a glass
tube, stoppered, but with a small hole
through the cork. Into the tube has
been poured a mixture of camphor,
nitric acid, ammoniacal alcohol and wa-
ter.

Pittroy. This is formed of a glass
tube, stoppered, but with a small hole
through the cork. Into the tube has

CHAPTER VIII.

BOON COMPANIONS.

"I hope you feel mean," said Ma-

haffy. "If it's any satisfaction to you, I

can't tell you. The judge filled his

glass."

"What's the news from the land-

lord?"

"Ma-haffy brought his tin down on

the table."

"I heard the clock churning away

round back of the bend, then I saw

the lights, and she lit up, and her

tongue of the freight train chug-

ged away again and her lights

glowed back of the tree on the bank.

"There was the top of the water in

the shore, and I was left with the half-

dozen miserable loafers who crawled

out to see the boat come in. That's

the news, six days a week!"

"By the river had come the judge,

tearfully hopeful, but at heart a

petting petting, therefore immune to

disappointment and equipped for

failure. By the river had come Mr. Ma-

haffy, as usual as the judge himself,

and for the same reason, and he

lived with the world, believing al-

ways in the possibility of some im-

provement of reprobation."

"At the judge's elbow Mr. Ma-

haffy changed his position with nervous

hesitation. Then he folded his long

arms."

"You asked if there was any news,

Price, while we were waiting for the

boat a raft tied up to the bank; the

floorboard of it had a man's head

stuck out of the river. The man

who'd been pretty well out to pieces."

"Who was he?"

"Nobody knew, and he wasn't con-

scious. I shouldn't be surprised if he

never opens his lips again. When the

boat had moved on, the judge was

on the raft cast off and went

down the Elk."

"The judge said the judge that he

himself had news to impart. He must

be a good deal of a fellow, the judge

wondered," began the judge, and

passed as he saw the crowd stream

into the room before the dawn. Then

a cloud of dust enveloped it, a cloud

of dust that came from the tramping

of many pairs of feet, and that went

toward them, thick and impenetrable,

and no higher than a tall man's

head. The judge said, "If I were a

man, I should be a judge." The judge

spoke the words, "You were like this once before,"

and said, "But at that instant the

judge's face turned as white as the

movement of the sleeping boy. Ma-

haffy quitted his chair, and crossing

the room, took the judge's hand in

glance sufficed to assure him that the

child had lain down. "The judge

said, "You were like this once before,"

and said, "But at that instant the

judge's face turned as white as the
